

Extender 2018 Release Notes

System Requirements

The system requirements for Extender are the same as those for Microsoft Dynamics GP. You can review the Microsoft Dynamics GP 2018 System Requirements documentation on CustomerSource or PartnerSource.

Prerequisites

Installing Extender 2018 on Microsoft Dynamics GP requires that the Microsoft Dynamics GP be version 18.00.0400 or higher. This version is available in the RTM release for Microsoft Dynamics GP 2018.

Installing

If you are currently using Microsoft Dynamics GP 2018, you just need to run through installation steps for this new build of Extender. The documentation on how to install can be found in the Extender Manual.

Upgrading

The Extender upgrade follows the supported upgrade paths from 2015 and 2016 that are available for Microsoft Dynamics GP. You can find these on PartnerSource or CustomerSource in the Upgrading to Microsoft Dynamics GP 2018 Hot Topic.

If you are currently using Microsoft Dynamics GP 2015 or 2016, the Extender upgrade steps can be found in the Extender 2018 Manual.

As in any upgrade process, we recommend that you use a test environment to walk through the upgrade process. By doing this, you can identify and resolve any potential issues that may occur in the upgrade process. A test upgrade also allows you to learn the new features in Extender before putting it into production.

Registration Keys

After installing this Extender build, you will need registration keys for it. These keys are available from your Partner or by calling eOne at 888-319-3663. If you previously had Extender 2018 installed, once you install this update, you will not need to enter new registration keys. If you had Extender 2015 or 2016 installed previously, you will need to enter in new registration keys for Extender 2018.

New Features

18.00.0001

- This release is a compatibility release for Extender 2018. It allows Extender to be compatible with Microsoft Dynamics GP 2018. It will contain the same features/fixes as the Extender 2016 build 16.00.0057 for Microsoft Dynamics GP 2016.

18.00.0015

- Inactive option for Windows and Forms
- Set position of window open to side of original window position
- Extra Windows on Extender Windows

18.00.0017

- Add disable/lock fields on Extender window/form in Dynamics GP Script
- About window specifies Extender or Extender Enterprise in live companies after registering

Fix List

18.00.0001

- This release is a compatibility release for Extender 2018. It allows Extender to be compatible with Microsoft Dynamics GP 2018. It will contain the same features/fixes as the Extender 2016 build 16.00.0057 for Microsoft Dynamics GP 2016.

18.00.0015

- Importing from 2015 to 2018 groups resources wrong
- Extender windows scrambled if they are in a Windows Group after updating to 14.00.0318
- On MC form, get stuck in the Exchange Rate Entry after adding a new exchange rate.
- Scripting not setting Extender Form Fields from GP globals
- Extender Linked Lookup to Microsoft Dynamics GP field does not function

18.00.0017

- Extender allows close/save of Extender Detail Window when not all required fields entered
- Using default template to add data to Extender Detail Window doesn't show data on initial open
- Note List Type not showing on Extra Window on Windows
- New fields added to existing Extra Window on Windows not saving
- Button position for Extra Window on Extender Window when many keys present
- Linked Lookup not working on Extra Windows on Extender Windows
- Currency fields on Extra window of Extender Window do not save the value
- Extender Note Options window
- Hide label missing on Extra Window Note List setup
- Extender Window Header data won't save if referenced by scrolling window calculations

- Using default template to add data to Extender Detail Window doesn't show data on initial open
- Extender allows close/save of Extender Detail Window when not all required fields entered

18.00.0021

- Extender Detail Window: If add new lines to scrolling window and then press Cancel, no warning is given
- Extender Detail Window: If edit an existing record and scroll window data and press cancel, EXT01110 not cleaned up
- SOP Copy feature is creating Extender data for the wrong document
- Deleting solution leaves records in the EXT01110 as orphans
- Need to add back the HotKey option on the Actions - this will go on each action since there can be multiple steps to the actions each with its own hot key.

18.00.0030

- Extra Windows Notes on Extender Windows
- Using the action Clear Field Values does not clear data for date field
- Extender Window report displays the fields in the order they were created, and not in Window field Order
- Extender windows with spaces or special characters in the window name throw an error when trying to create a view
- Extender display dialog doesn't run action when it is supposed to
- Note icon on Extra Window Setup window is not changing color to indicate a note is attached

18.00.0037

- Extender forms let 2 people edit a form record at the same time
- Extender View creates with Inner Joi when detail is present
